It wasn't included, so thank you! Just based on a brief comparison with the site plans, the pole locations don't seem to match up. So the plans should be revised to reflect the plan from Versant.

Also, on the lot combination issue that I mentioned in a previous email, if the subdivision plan results in those lots being combined, that should take care of the issue without having to go through a separate process.

Hi Anja,

Here is the plan from Versant with where we are required to place the poles. Is this what you were looking for? I thought we had sent earlier, but perhaps not.

Morning Emily, Brittany received the check this morning. I have attached a snip it and a google earth file for the engineers if needed. Let me know if you have any questions!

Just want to confirm, I assumed you wanted us to build this extension vs a contractor since there is a bit more planning involved. Is that right?

Thank you.

Shaina Lycette
